## **InnoMedia Announces Large Purchase Order of VoIP Adapters from Phone Power LLC**

SAN JOSE, Calif. & WINNETKA, Calif. --(Business Wire)--

InnoMedia today announced receipt of a large purchase order of InnoMedia MTA6328 telephone adapters from Phone ([News](#) - [Alert](#)) Power LLC, a leading provider of Internet telephone service in North America.

"We started field testing this particular InnoMedia model in Q1 of this year. The feedback from our customers and our support engineers was very positive. We felt the MTA6328 model offers us significant competitive advantages and excellent out-of-band management," says Jim Murphy, President of Phone Power. The purchase order will cover inventory for both the Phone Power brand (<http://www.phonepower.com>) and its sister brand VOIP.COM (<http://www.voip.com>).

"The MTA6328, coupled with InnoMedia's ([News](#) - [Alert](#)) exclusive Device Management System (DMS), allows our support engineers to quickly access an end-user's device for diagnostics, without the painful process of having the end-user disable their firewall or temporarily change settings," Murphy added. Phone Power expects to start shipping the new InnoMedia units, both to their direct customers and to retailers by Q4 of 2011.

"We are delighted that Phone Power has chosen the InnoMedia MTA6328," said Shailesh Patel, Sr. Director, Product Management at InnoMedia. "Using our highly manageable devices, Phone Power customers are assured of optimal performance in different network environments."

InnoMedia MTAs are compatible with either cable HFC access networks or those that are Ethernet-based. They cover the range from 2 analog voice ports through to 24 voice ports to deliver solutions for all types of subscribers from the smallest residential customer to medium-sized business customers, and can be managed seamlessly with the highly redundant and highly scalable DMS.

### About InnoMedia

Founded in 1995, InnoMedia is a privately owned multinational organization with operations in the United States, Singapore, Taiwan and China. The company delivers

Internet, broadband access IP Telephony, and SIP Trunking solutions to Cable MSOs, broadband service providers and telephone companies.
